Valves and Components – System and Variety

Innovative and modern productions technologies as well as high reliability - these are the challenges of the future.

RIEGER is offering highest possible productivity, safety and quality in all fields of

dairies
food industry
pharmaceutical industry
biotechnical industry.

High quality standards, qualified know-how in manufacturing and innovative steady development of our products guarantee perfect solutions to our customers.

RIEGER
certainly your right partner

As a reputable German company of the NEUMO-Ehrenberg group active worldwide, RIEGER disposes of the necessary economical capability and international experience.

Customer specific requirements are planned in our CAD-based design department and then produced in our modern CNC manufacturing plant.

Modern manufacturing technology with the experience and willingness of our skilled staff constitute the basis for constant high quality of our fittings, valves, pipe fittings and components.

Sterile production plants in the food industry, the pharmaceutical and biotechnic industries require new standards for sterile components such as valves which can only be realised through uncompromising choice of material and aseptic design.

Our components and devices guarantee high reliability and economy of operation.

The RIEGER valve program ensures total reliability in plant systems and in process control.
