

# Pressure Control Valves

## Back Pressure Regulators UV 3.9

### Millibar Control Valve

#### Technical Data

Connection DN	15 - 50
Connection G	1/2 - 2
Nominal Pressure PN	1 - 2,5
Inlet Pressure	0.01 - 1.1 bar
K <sub>vs</sub> -Value	0.2 - 28 m <sup>3</sup> /h
Temperature	130 °C
Medium	liquids and gases

#### Description

Self-acting back pressure regulators are simple control valves offering accurate control while being easy to install and maintain. They control the pressure upstream of the valve without requiring pneumatic or electrical control elements.

The UV 3.9 backpressure regulator is a spring-loaded diaphragm-controlled proportional control valve designed for very low inlet pressures. This bypass valve is manufactured from deep-drawn stainless steel featuring excellent corrosion resistance. The valve cone can be fitted with a soft or metallic seal.

The inlet pressure to be controlled is balanced across the valve seat by the force of the valve spring (set pressure). If the inlet pressure rises above the set pressure, the valve opens. With decreasing inlet pressure the valve control orifice reduces, when the pipeline is depressurised, the valve is closed. Rotating the adjusting screw clockwise increases the inlet pressure.

These valves are no shut-off elements ensuring a tight closing of the valve. In accordance with DIN EN 60534-4 and/or ANSI FCI 70-2 they may feature a leakage rate in closed position in compliance with the leakage classes III or V, optional IV.

#### Standard

- » All stainless steel construction

#### Options

- » For toxic or hazardous media: sealed spring cap complete with leakage line connection (incl. sealed adjusting screw). Must be installed with a leakage line capable of draining leaking medium safely and without pressure
- » Various diaphragm and seal materials suitable for your medium
- » Special connections:  
Aseptic, ANSI or DIN flanges, welding spigots; other connections on request
- » Special versions on request

Operating instructions, know how and safety instructions must be observed. All the pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.

#### K<sub>vs</sub> Values [m<sup>3</sup>/h] for Straight-way Valve

G 1/2 DN 15	G 3/4 DN20	G 1 DN 25	G 1 1/4 DN 32	G 1 1/2 DN 40	G 2 DN 50
5	7	8	22	22	22

#### K<sub>vs</sub>-Values [m<sup>3</sup>/h] for angle and U-shaped valve

0.2	0.9	2.2	3.9	6	12	18	28
-----	-----	-----	-----	---	----	----	----
