

Product Information P42

FOOD

Pressure Transmitter P42

Application/Specified usage

- · Pressure measurement in pipes and tanks
- · For process temperatures up to 300 °C (572 °F) with optional cooling section

Application examples

Sanitary pressure monitoring for breweries, dairies and food and beverage production

Hygienic design/Process connection

- · Hygienic process connection with CLEANadapt
- · All wetted materials are FDA-conforming
- · Sensor completely made of stainless steel
- · Complete overview of process connections: see order code
- The Anderson-Negele CLEANadapt system offers a flow-optimized, hygienic and easily sterilizable installation solution for sensors.

Features

- · CIP/SIP cleaning up to 150 °C (320 °F) for max. 60 minutes
- · Rapid response time of < 5 ms
- · Vacuum-proof
- · Easy to operate
- · Electrical connection with M12 plug connection
- · Available with relative or absolute measurement cell
- · IO-Link output communication

Options/Accessories

· 3.1 Material certificate

Measuring principle of the pressure sensor

This unit utilizes an internal piezoelectric transducer to convert the process measurement into a corresponding mV signal. The mV signal then passes through custom linearization and conditioning circuitry. The resulting signal is an industry standard IO-Link digital communication.

With relative (gauge) pressure sensor the back of the transducer is vented to atmospheric pressure, i.e. this sensor measures the gauge pressure and/or vacuum relative to the atmospheric pressure.

With absolute pressure sensor the back of the transducer is subject to full vacuum and then permanently sealed, i.e. this sensor measures pressure relative to an absolute vacuum.

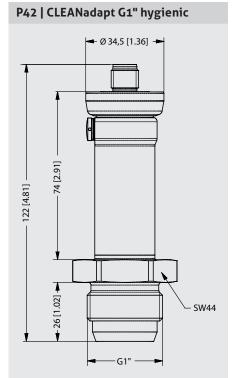

Communication

Startup

- · Connect the sensor with the supply voltage (18...30 V DC) -> see "Electrical connection" section.
- · It is recommended to check the zero point every six months.
- · Further maintenance work is not required.

Electrical connection

Configuration M12 plug

- 1: + power supply
- 2: not Connected
- 3: power supply
- 4: SIO / IO-Link

Mechanical connection/Installation

For G1" CLEANadapt only

- · Attention: The maximum torque for mounting is 20 Nm!
- · Use Negele CLEANadapt system for safe operation of measuring point.
- Use a welding mandril for correct installation of CLEANadapt weld-in-fittings. Please pay attention to the weldin and installation details in the CLEANadapt product information.

Conventional usage

- · Not suitable for applications in explosive areas.
- Not suitable for applications in security-relevant equipments (SIL).

Conditions for a measuring point according to 3-A Sanitary Standard 74-06

- · The sensors with Tri-Clamp process connection are prepared for 3-A compliance.
- · The sensors are designed for CIP-/SIP-cleaning. Maximum 150 °C (302 °F) / 60 minutes.
- · Only with 3-A conforming Tri-Clamp connection allowed.
- · Mounting position: The mounting position and self-draining must be in accordance with the current 3-A Sanitary Standard.

Warnings FOOD

Cleaning and maintenance

5

- · Don't use sharp items or aggressive detergents for cleaning.
- In case of using pressure washers, don't point nozzle directly to electrical connection!

Reshipment

- Sensors and process connection must be clean and must not be contaminated with hazardous media and/or heatconductive paste. Note the cleaning information!
- To avoid damage of the equipment, use suitable transport packaging only.

Transport/Storage

- · No outdoor storage
- · Store in an area that is dry and dust-free
- · Do not expose to corrosive media
- · Protect against solar radiation
- · Avoiding mechanical shock and vibration
- Storage temperature -10...85 °C (14...185 °F)
- · Relaltive humidity max. 80 %

Standards and guidelines

Compliance with the applicable regulations and directives is mandatory.

Note on CE

- Applicable directives:
 Electromagnetic Compatibility Directive 2014/30/EU
- · Compliance with the applicable EU directives is identified by the CE label on the product.
- The operating company is responsible for complying with the guidelines applicable to the entire installation.

Disposal

- · Electrical devices should not be disposed of with household trash. They must be recycled in accordance with national laws and regulations.
- · Take the device directly to a specialized recycling company and do not use municipal collection points.
